

I am very tired of having my options limited by big corporations who want to stifle the competition to force me to either listen to or buy only their services.

Isn't it bad enough I have only one choice for cable television, now that I have satellite radio and can listen to what I want to listen to when I want to and get the information I need when I need it you want to take that away, too! Give me a break! I don't want to listen to giggling and disrespectful DJ's or annoying pranks just so I can hear the traffic report and I don't think I should have to!

I say this legislation needs to be stopped, and last I checked government was about protecting interests of the majority of the people not just the big corporations who can afford to pay for it!
